Darcy

Cindy is looking for feedback on some OAR bullet points for the Gov staff meetings you mentioned yesterday.

CO/UT ozone and oil and gas seem to be the issues OAR is interested in.

"We are considering a FIP for the Uintah and Ouray Indian Reservation to address ozone non-attainment concerns stemming from oil and gas operations in the Uinta Basin in Utah"

This sounds fine, I guess we could add the "to level the playing field with UT's rules" and maybe "existing sources."

**Importance:** High

Joan/Carl -

See request below. I think the way they've characterized our R8 UB efforts is good - wanted to run by you:

"We are considering a FIP for the Uintah and Ouray Indian Reservation to address ozone non-attainment concerns stemming from oil and gas operations in the Uinta Basin in Utah"

You good with that? Carl, did you want to say anything else about Colorado re: ozone?

Thanks,

**Cindy Beeler**

Hi Cindy,

We're working on prep materials for Janet's 11/20 meeting with a variety of Governor staff offices. The request is for any "hot" issues regarding ozone or O&G for Alaska, FL, WA, CT, OR, UT, IA, CO, MN.

Email below, do you have any additional info regarding UT and FIP for reservations? Just want to make sure I have all info

Thanks,

KB

This is what I found out so far. Let me know if you need more info on any of this.

Ozone: I'm not sure if this qualifies as "hot" (it's old news in that it's already been proposed, and final rule is well under way), but there are a handful of Marginal nonattainment areas in CT and CO that are being reclassified as Moderate under the 2008 ozone NAAQS.

For oil and gas (so, Alaska, UT, CO):

- PACS has all the talking points for the rules. We extended the comment period on the rules to December 4, so we are still in the comment period and encourage them to provide comments on all the rules
- UT – I am not sure how much we have said on this publically, so I am not sure how we are characterizing it, suggest the following:
  - We are considering a FIP for the Uintah and Ouray Indian Reservation to address ozone non-

attainment concerns stemming from oil and gas operations in the Uintah basin in Utah

OID has the lead on this from OAQPS – but specific talking points should probably come from Region 8, suggest Cindy Beeler

---

Thank you,
